Experience

Boston Children's Hospital	Jun 2026 – Present
<i>Research Assistant – Computational Health Informatics Program</i>	
• Developing methods to jointly estimate dynamical states and the quality of observed data to support predictive modeling and triage decisions with uncertainty. • Evaluating how LLMs interpret continuous glucose monitor data to inform safe integration in diabetes care. • Building pipelines to process FHIR data, identify cohorts, run evaluations, and analyze model outputs.	
Mayo Clinic	May 2025 – Aug 2025
<i>Research Student – Mayo Clinic Platform</i>	
• Analyzed risks to patient re-identification from models trained on de-identified medical images, informing secure modeling practices with medical imaging.	
Voythos	May 2025 – Jul 2025
<i>Data Science Intern</i>	
• Performed data preprocessing, augmentation, modeling, and evaluation to segment the aorta and detect thrombosis in chest CT images for use in a multimodal approach to predict risk of type B aortic dissection.	
Mayo Clinic	May 2024 – Aug 2024
<i>Undergraduate Intern – Mayo Clinic Platform</i>	
• Developed an end-to-end workflow for customer AI/ML development with DICOM medical images by curating and annotating data, training models, and evaluating the efficacy of internal tools. • Built dashboards in Power BI to geographically track customer acquisitions, visualize account metrics, and present product KPIs. • Queried clinical databases with SQL to identify cohorts of data for prospective customers.	
BC Children's Hospital Research Institute, UBC Faculty of Medicine	May 2023 – Apr 2024
<i>Research Assistant</i>	
• Automated the collection and analysis of continuous glucose monitoring data to examine the effect of a peer support intervention on glycemic control, a secondary outcome of a clinical trial. • Co-authored study protocols, ethics amendments, and data safety and monitoring plans.	

Education

University of British Columbia, Vancouver, Canada	May 2026
Bachelor of Arts in Cognitive Systems, Minor in Data Science – High Distinction	
Relevant coursework: Statistical Modeling, Databases, Applied Machine Learning, Data Visualization, Logic	

Awards

Andrew Wade Memorial Award in Visual Analytics	Mar 2026
UBC Arts Undergraduate Society Student Conference Grant Award	Mar 2025

Technical Skills

Languages: Python, R, SQL, JavaScript/TypeScript, HTML/CSS

Tools/Frameworks: Git, Docker, PyTorch, React, Power BI, REDCap, Epic EHR
